Product fact sheet #E1-Tx-L3-C4 for the health market

E1-T1-L3-C4 Advice and Guidance

On completing the course the practitioner will have a theoretical and practical understanding of the most important principles and methods in advice and guidance work. This means having the necessary insight and skills to carry out such work in practice. The programme also aims to develop skills in colleague guidance.

Target group

People with an interest in guidance and counselling, and who would like a deeper professional and personal competence within this field, who want to acquire the competence to contribute to the build-up of a professional service offer in hospitals and local care institutions.

Objectives

On completing the course the practitioner will have a theoretical and practical understanding of the most important principles and methods in advice and guidance work. This means having the necessary insight and skills to carry out such work in practice. The programme also aims to develop skills in colleague guidance.
